CD-93-02 (MC)

Dear Manufacturer:

Subject: Motorcycle Data Input to EPA's Data Base for 1994 MY

In manufacturer guidance letter CD-91-08, December 12, 1991, the Certification Division describes a new standardized engine family and evaporative family name format. Manufacturers must use these new family names for 1994 model year motorcycles. Copies of new computer forms that use this name format (Rev:01/25/93) for 1994 MY and later are enclosed.

When requesting certificates for 1994 and later model years, Motorcycle Certification Information Sheets for Family Information and Test Information must be submitted on these new computer forms. Especially notice that EPA STANDARDIZED ENGINE FAMILY NAME is now 12 characters rather than 11. Please use these exact forms or photocopies of them. Any alterations to these forms could result in unnecessary certification delays.

If you have any questions about the information in this letter, or if need additional forms, please contact your EPA certification team representative listed in Enclosure A.

Sincerely,

Robert E. Maxwell, Director  
Certification Division
